

**Project nr.:** T3CO50S  
**Project name:** Tests made on 3CO Socks  
**Supervisor:** Þröstur Guðlaugsson  
**Company representative:** Helga Viðarsdóttir

**Project:** To test laundering effects and durability of 3CO socks manufactured by Metal Equipped ehf.

**Method:** The socks were washed in a washing machine with neutral detergents after having been worn for 6 hours within leather shoes. The cycle was repeated 87 times. Washing temperature was 60°C. After washing the socks were tumbler dried at 600 rpm. Drying temperature started at 70°C and ended at 45°C.

**Test results:**

<b>Colorfastness:</b>	<b>Very good</b>
<b>Abrasion resistance:</b>	<b>Very good</b>
<b>Shrinkage:</b>	<b>- 4% - Normal</b>
<b>Changes in fabric:</b>	<b>None other than normal shrinkage</b>
<b>Durability:</b>	<b>Outstanding</b>

**Final remarks:** The test shows that the socks show superior resistance to laundering effects and have excellent durability.
